

TERMS & CONDITIONS

1. INTRODUCTION

LAW Wireless, LLC DBA County Line Communications is referred to as LWS in these pages. LWS strives to provide the highest quality Internet service available and at the same time respect standards which have developed within the Internet community. To that end, certain activities and conduct is inappropriate or abusive and will not be tolerated on our network. This policy is not meant to be exhaustive, but is necessary to protect our ability to operate a fast, reliable network and to protect the collective interests of our customers. LWS reserves the right to make changes to this policy at any time without individual notice to each customer. Use of LWS services is conditioned upon customer compliance with our terms and conditions of service (sometimes called acceptable use policies). Those who find our terms and conditions of use unreasonable should discontinue use of LWS services; continued use of our services amounts to acceptance of these policies.

2. DEFINITION OF "UNLIMITED INTERNET ACCESS"

On unlimited plans LWS does not charge extra regardless of the amount of use, effectively providing Unlimited Internet Access. While there is no extra charge we expect our customers to be reasonable so that everyone can enjoy quick and convenient access. This policy is applicable to all unlimited broadband connections.

3. CONNECTION SPEEDS

Bandwidth is delivered as a 'Best Effort' service so the speeds specified in the agreement are maximum service capability speeds, and are not guaranteed. Customer agrees that actual Internet speeds obtained will vary based on a number of factors, including the capabilities of customer's devices, in-home Wi-Fi signal level or interference, performance of other interconnected Internet networks, and any network management methods employed by LWS. Please note that all computers on a home network will be sharing a single connection. Simultaneous use of high-bandwidth applications by multiple users may result in degradation of download and surfing speeds.

4. ROUTER

To ensure the best possible customer experience, LWS supplies a managed wireless router with all plans. The managed router allows us to remotely troubleshoot your connection, and assist with any connectivity issues. The support ends at the LWS supplied router. Any customer device issues will be handled on a case by case basis.

If a customer desires to use their own router, the customer owned router must provide NAT on the WAN/Internet interface and will connect to the POE adapter installed by LWS. In the case of a customer owned router, the customer will be solely responsible for all router maintenance, management, and support. Any assistance provided by LWS is without warranty of any kind and in consideration for such assistance you expressly waive any and all claims against LWS that may arise from such assistance.
